- I will do (or did) conversations before writing.
- I will do (or did) writing before conversations.

## Conversation phrases

### Instructions

If you do conversations before writing, then during your writing time write phrases that you wanted to say -- that is, phrases that you should have said.

If you do writing before conversations, then during your writing time write phrases that you plan to say.

### You are the airline clerk.

Ask your passenger for her passport.

\_\_\_\_\_

Ask how many people are traveling with her.

\_\_\_\_\_

Ask what kind of seat she would like.

\_\_\_\_\_

Ask how many bags she is checking.

\_\_\_\_\_

Ask for her destination.

\_\_\_\_\_

Tell her that you have been to her destination, and that you enjoyed the place very much.

\_\_\_\_\_

Tell her that her flight has been delayed by 2 hours.

\_\_\_\_\_

Tell her that she should be at the gate 30 minutes before departure time.

\_\_\_\_\_

### You are the passenger.

Ask the airline clerk for a window seat.

\_\_\_\_\_

Ask him for your flight number.

\_\_\_\_\_

Ask him for your departure time.

\_\_\_\_\_

Ask him for your gate number.

\_\_\_\_\_

Ask him when you should arrive at your gate.

\_\_\_\_\_

He says you've been upgraded for free to business class! Tell him how happy you are.

\_\_\_\_\_

## Reading and writing

### Instructions

During your writing time, read the following text and write your responses. Your objective is to understand the text, and state your opinion. You may use any book, tool, or device. You may ask friends for help.

California lighthouses dot a coastline that is rugged, forbidding, beautiful, often foggy and frequently deadly. Lighthouses on the western coast were built later in the nation's development, driven partly by the discovery of gold. Life at a lighthouse was both rich and harsh.

The Point Reyes Lighthouse is located in the foggiest point on the Pacific Ocean, and possibly in all of America. Point Reyes is cloaked in fog for nine months of the year, for a total of almost 2700 hours each year. It is the nation's windiest headland as well. The wind currents are confusing, and the sea is too deep for mariners to use lead lines to determine depth or position. Point Reyes is also a narrow finger of land that curves seaward for 10 miles.

Originally, builders were going to place the lighthouse at the top of the point, but officials realized that the light would be hidden in fog, so they built it at the very tip. To get to the lighthouse, visitors descend 300 steps. Keepers had to climb 638 steps to reach the tower and foghorn house from the keepers' dwelling.

The lighthouse observation platform is an excellent site to see migrating gray whales from January through April. The rocky shelves below the lighthouse are home for thousands of common murrets (a species of sea bird), and sea lions.

What are the characteristics of the Point Reyes Lighthouse?

Would you like to visit the Point Reyes Lighthouse? If yes, what would you do there? If not, why not?

## Video

### Instructions

Watch the video, and answer questions at any time during the video, or during your writing time.

Circle the correct answer.

California has had lighthouses for:

1. thousands of years
2. hundreds of years
3. about 300 years
4. about 150 years

Park Ranger Aptekar is giving:

1. a comedy performance
2. a geology lecture
3. a job interview
4. a moonlight tour

Where is the *new* lighthouse?

1. 10 miles away
2. a new lighthouse doesn't exist
3. at Drake's Bay
4. next to the old lighthouse

Fill in the blanks with words or phrases that match the content of the video. There may be more than one correct answer.

Every night, sometimes in thick fog or strong winds, the lighthouse keepers walked \_\_\_\_\_ the steps to the lighthouse door. Then they walked up the tower to light the lamp.

In order to make the light \_\_\_\_\_ every 5 seconds, they built a lens (called a fresnel lens) weighing 6000 pounds around the lamp. The light was left burning \_\_\_\_\_ night. But because the lens turned, the light appeared as \_\_\_\_\_ to people at sea.

To spin the lens, the lighthouse keeper first needed to \_\_\_\_\_ a weight weighing 175 pounds. Then the lighthouse keeper \_\_\_\_\_ the lens to start it spinning smoothly on brass wheels.
