

オープンコースウェアセミナー

高等教育とオープンコンテンツ

於：7/29 (火) 13:00-14:00 情報基盤センター北館 共催：北大 OCW、北大情報基盤センター

Openness and the Disaggregated Future of Higher Education

Prof. David Wiley

Abstract:

Open educational resources such as MIT OpenCourseWare demonstrate that educational materials are increasingly becoming a free, ubiquitous infrastructure for teaching and learning. Leveraging free and open access to a wide range of high quality educational resources can allow the faculty member to drastically change their role in supporting learning. The increasing connectivity of teachers and learners via email, SMS, instant messenger, Twitter, and other tools allows us to move beyond "groups" in our thinking of multi-person assignments to a broader, more loosely knit notion of networks of learners.

Large-scale, collaborative social networks challenge our ideas of academic honesty but are a simple fact of life that instructors can either fight or leverage. Open educational resources and social networks point toward a future for higher education in which services traditionally consolidated within a single institution (e.g., providing content, providing learning support, providing assessments, providing degrees) are disaggregated and provided by a number of institutions that compete on quality of service and price for learner business.

Biography:

Dr. David Wiley is Associate Professor of Instructional Psychology and Technology at Brigham Young University and President of the Board of the Open High School of Utah. He was formerly Associate Professor of Instructional Technology at Utah State University and Director of the Center for Open and Sustainable Learning, a Nonresident Fellow at the Center for Internet and Society at Stanford Law School, a Visiting Scholar at the Open University of the Netherlands, and is a recipient of the US National Science Foundation's CAREER grant. He is the founder of OpenContent, coining the term "open content" in 1998 and releasing the first open source-style licenses for content. His career is dedicated to increasing access to educational opportunity for everyone around the world.
